Event Description:

The leaps in AI innovation raise ethical, legal, regulatory, and policy questions regarding what should be regulated, legislated and how it should be done. From the perspective of law, the emergence of AI has unsettled established principles of law, necessitating re-evaluation of regulatory approaches. The role of regulation in creating the environment for AI to flourish has therefore become timely and as various countries and regions are beginning to develop regulatory frameworks for AI, it is crucial to consider the challenges associated with determining what should be regulated, legislated and the appropriate methods to achieve this.

Whilst capitalising on the benefits of AI technologies, the new risks arising from their use and the complexities they produce cannot be ignored. There are concerns that some uses of AI could damage our physical and mental health, infringe on the privacy of individuals, and undermine human and consumer rights. Public trust in AI will be undermined unless these risks, and wider concerns about the potentials for bias and discrimination, are addressed.

This workshop aims to propose strategies for AI regulations and legislations that are consistent with the pro-innovative stance of several nations, especially the UK. This workshop will host paper presentations exploring the potentials, flaws, and the risks of AI vis-à-vis regulations of AI across but not limited to the following themes:

• AI and intellectual property,

• AI and corporate governance,

• AI, liability, and safety,

• AI and data protection and governance.

• AI and human right

• AI in health care

Submission Details:

Abstract of no more than 250 words (excluding title) should be submitted via email to Dr Ezinne Igbokwe **ezinne.igbokwe@ntu.ac.uk** and Dr Onyeka Nwoha **onyeka.nwoha@ntu.ac.uk**

The deadline for submissions is **August 1, 2023**, and speakers will be notified by August 7, 2023.

Keynote Speaker

Professor Zhao Jingchen

Professor Zhao is a professor of law and co-director of the Centre for Business and Insolvency Law at Nottingham Law School, Nottingham Trent University. Professor Zhao has extensive publications in AI and corporate governance and teaches on the AI and Law LLM module.

Guest Speakers:

Professor Rebecca Parry

Professor Parry is a professor of law and co-director of the Centre for Business and Insolvency Law at Nottingham Law School, Nottingham Trent University. She is the module leader for AI and Law LLM module. She is interested in the intersection of technology and commercial law, including the regulatory framework needed to support digital economies and the use of artificial intelligence.

Professor Richard Hyde

Professor Hyde is a professor of Law, Regulation and Governance and Deputy Head School of law, University of Nottingham. Professor Richard has interest in the AI and liability as it relates to Autonomous or self-drive cars.
